

Why the need for Data Destruction?

"In 2016, there were 454 data breaches with nearly 12.7 million records exposed."

Source: 2016 Identity Theft Resource Center Data Breach Category Summary

"The U.S. government has spent \$100 billion on cybersecurity over the past decade, and has \$14 billion budgeted for cybersecurity in 2016."

Source: The Business of Cybersecurity: 2015 Market Size, Cyber Crime, Employment, and Industry Statistics. from Forbes
